

Technology

Shared with You

Surface shared content and collaborate in your app.

iOS 16.0+

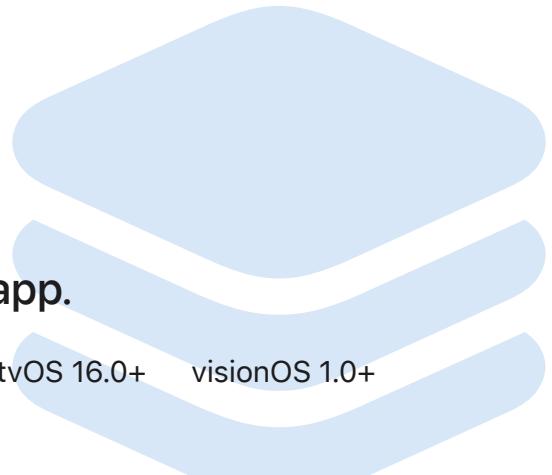

iPadOS 16.0+

Mac Catalyst 16.0+

macOS 13.0+

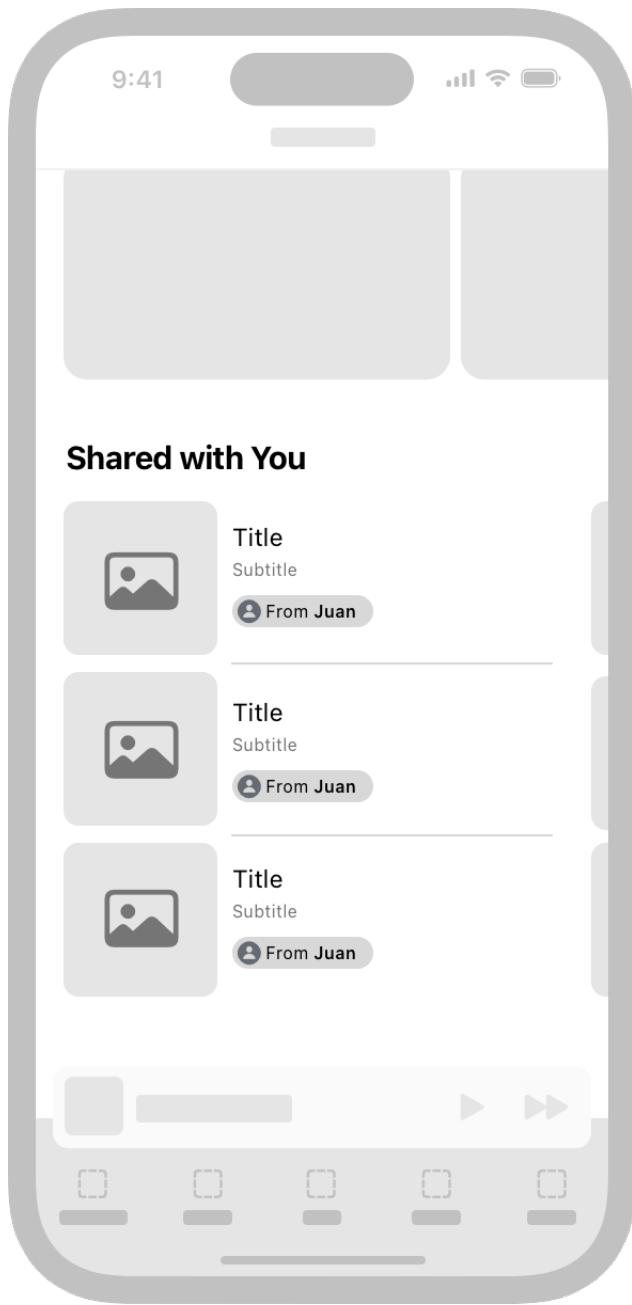

tvOS 16.0+

visionOS 1.0+

Overview

Access and view content shared from Messages across the system and continue the messaging experience without leaving your app. Incorporate Shared with You to make it easier for people to access content shared through conversations or notifications.

Support a Shared with You shelf in your app to visually represent shared items with an [SWAttributionView](#) that the system renders. Securely share universal links that your app accesses using the [SWHighlight](#) class. For information on getting started, see [Making your app content shareable](#).
