API Collection

Shared content interactions

Use highlights and attribution views to manage participants and trigger events for shared content.

Topics

Attributions

class `SWAttributionView`

A view that displays the sender who shares a highlight and provides related actions.

Highlights

class `SWHighlight`

An object that represents a universal link to share by any number of contacts in one or more conversations.

class `SWHighlightCenter`

An object that contains a priority-ordered list of universal links to share with the current user.

Highlight events

protocol `SWHighlightEvent`

A protocol that defines an activity that the system posts in response to a user action for a highlight.

class `SWHighlightChangeEvent`

An object that represents change activity for a highlight.

class `SWHighlightMembershipEvent`

An object that represents membership activity for a highlight.

class `SWHighlightMentionEvent`

An object that represents mention activity for a highlight.

class `SWHighlightPersistenceEvent`

An object that represents persistence activity for a highlight.

Participants

class `SWPerson`

An object that tracks participants in a collaboration.

class `SWRemoveParticipantAlert`

An alert that prompts the user to remove a participant from a Messages group.
